About Me

QA Automation Engineer with 19 years of experience in testing, currently focused on test automation using Playwright and TypeScript.

Actively exploring AI-assisted testing, with a strong interest in integrating intelligent automation into QA processes.

Experienced in building automation frameworks, data-driven testing, and ensuring high-quality user experiences across complex systems.

Automation & AI Experience

- Building and maintaining UI automation framework using Playwright and TypeScript (POM architecture)
- Implementing data-driven testing using JSON/CSV
- Using GitHub Copilot to assist in test development and improve productivity
- Exploring AI-assisted testing approaches and automation workflows. Familiar with AI agent concepts and their potential application in test automation.
- Working with modern QA tools and CI/CD processes (GitHub Actions, Jenkins)

GitHub Portfolio
